EXPERIENCE SUMMARY:

- Professional web developer with over three years of working in web applications development
- Work with front-end technologies including ReactJS, AngularJS, CSS3 and HTML5
- Strong background working in the full software development life cycle
- Great communication skills and ability to work well in both group and individual settings
- Strive to positively influence work environment, with the goal of continuous improvement

KEY TECHNOLOGY AREAS:

JavaScript, ES6 (ES2015), ReactJS, React-Redux, AngularJS, C#, ASP. Net MVC3/4, MVVM, Ajax, jQuery, Sass/CSS3, HTML5, NodeJS, Webpack, Babel, Gulp, Heroku, OpenShift, Jenkins CI, RESTful services, WPF, XAML, SQL Server, Automated Testing, Selenium, IIS7, Apache, Agile/Scrum Development, Git, Rally Dev, JIRA, Team Foundation Server
Limited exposure to C/C++, nHibernate, Java/J2EE, MongoDB, Flex box, CQ/AEM6, Maven, Talend (ETL)

PROFESSIONAL EXPERIENCE:

MeridianRx, Detroit, Michigan

Senior Software Engineer, August 2015 – Present

- Creating cutting edge ES6 ReactJS application to integrate RESTful services
- Leverage .Net background to be able to bridge the gap between WebApi developers and JS developers

Optum, Southfield, Michigan

Senior JavaScript Developer, January 2015 – July 2015

- Developing SPA application, integrating with RESTful services with responsive design
- Focusing on building modular, and consumable Angular directives to be leveraged across projects
- Working to architect a solution to integrate CQ/AEM6, JSON/REST services, AngularJS, and OpenShift
- Managing time effectively while working from home 40%

Urban Science, Detroit, Michigan

Associate Software Developer, June 2012 – January 2015

- Developed with HTML/jQuery/JavaScript/CSS/C#
- Utilized AJAX to develop dynamic criteria selection tool for Hyundai Motors customer
- Used SASS to refactor CSS scripts for easier future maintenance
- Created an Administrative feature to be used as a tool to upload report definitions in XML.
- Performed Issue Tracking and Application support for the Premium Sales Viewer (PSV) Product
- Developed a WPF Application that enables automakers to place their dealerships in optimal locations
- Developed an automobile sales dashboard viewer using MVC3
- Created automation packages to allow remote teams to greatly reduce effort
- Worked within the TSP (Team Software Process) to estimate and achieve a high quality product
- Displayed flexibility by actively taking on other roles, and volunteering for tasks

Sircon, A Vertafore Business, Okemos, Michigan

Software Development Intern, October 2011 – March 2012

- Used JIRA to target and track deadlines
- Worked independently to manage the bug backlog

PROFESSIONAL DEVELOPMENT:

South East Michigan JavaScript (SEM-JS) & Michigan .Net User Group (MIGANG) Member

Attending various tech talks to learn about the future of the development community

EDUCATION:

Bachelor of Science, Computer Science

Michigan State University, East Lansing, MI

3.59 GPA, 3.51 Technical GPA
